### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Claims 21-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5, filed 27 December 2002.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Chen et al. (6243498).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived

Art Unit: 2624

from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Chen et al '498 discloses (column 2, lines 21-37) a feedforward compensation processor comprising a multiplier which receives a video image and multiplies it by a noise reducing constant (readable upon "one of a noise reducing constant and one") which is supplied by a shunting multiplication processor in the presence of one of a fixed pattern noise and a temporal noise in a video image frame.

***Allowable Subject Matter***

4. Claims 3-20 are allowed.
5. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter:

Re claim 2, the art of record does not teach or suggest the use of a zero noise reduction multiplier (the use of a zero noise reduction multiplier would render the disclosed noise reduction arrangements in the art of record inoperative).

Art Unit: 2624

Re claims 3, 7, 13, & 18 (and dependent claims 4-7, 9-12, 14-17, & 19-20), the art of record does not teach or suggest the recited arrangement of selective multiplication of one of the recited first and second multiplication constants generated by the recited frame processings.

**Conclusion**

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sokawa et al, Chen et al. (6211515), Hurst et al, and Kasahara et al. disclose further examples of selective signal multiplication coefficients.

Chen et al (WO 200079782 A2) is cited as a related application.
